

## Your Dark Side

(Words and music by Joshua Starmer, copyright 2016)

### V1

He could carry a tune

**F**                      **C**

So he thought that he would try to be a rock star

**Gmin**                                      **Bflat**

He worked to late at night

He played his music even later at the back bar

But that wasn't enough

He did his best but he still didn't get far

### C1

Show me what you can do

**F**                                      **Gmin**

Show me something that's new

**Eflat**

Don't be afraid of your dark side baby

**Bflat**

Let's just see where it goes

Through the highs and the lows

Don't be afraid of your dark side

### V2

He moved from town to town

He always wanted change to come from the outside

He never really unpacked

He said he worried about the waves during high tide

There's no settling down

When you chase a dream that sure knows how to hide

### C2

Show me what you've got

I might like it, might not

Don't be afraid of your dark side baby

Let's just see where it goes

Through the highs and the lows

Don't be afraid of your dark side

### **Bridge**

I know this man

**C F Bflat Gmin**

He's looking back at me

**C F Bflat Gmin**

He sees what I can't see

**C F Bflat Gmin**

He sees what I can't see

**C F Bflat -**

### **V3**

He said he's still holding on

But every year he feels his fingers slip a little more

The bills keep ringing the bell

While his money sneaks away through the back door

It's not like when he was young

He spent his pennies on the music in the record store

### **C1 and C2**
